

EDUCATION IN ACTION

Treynor Community School District

October 2021

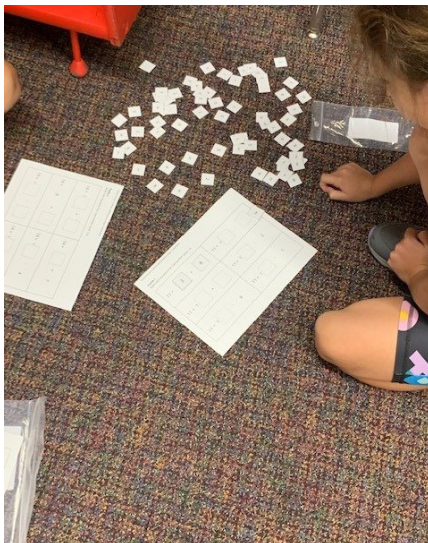

COACHING CYCLES

Mr. Koenck and Ms. Lawrence collaborated to build a unit for the 8th-grade US History class. Students pictured are using passages from Revolutionary Era documents to determine if the American Revolution was truly revolutionary.

SCIENCE IS COOL!

Students in Mr. Nichol's classroom are exploring the relationship between mass, force, and change in velocity by applying the same force on a golf ball and ping pong ball and recording how quickly each traveled over a yard.

The only way to learn mathematics is to do mathematics. ~ Paul Halmos

Students in Mrs. Robinson's 2nd-grade classroom are practicing using their number awareness to complete equations. Each partner completes his/her chart and then they switch to check each other's work.

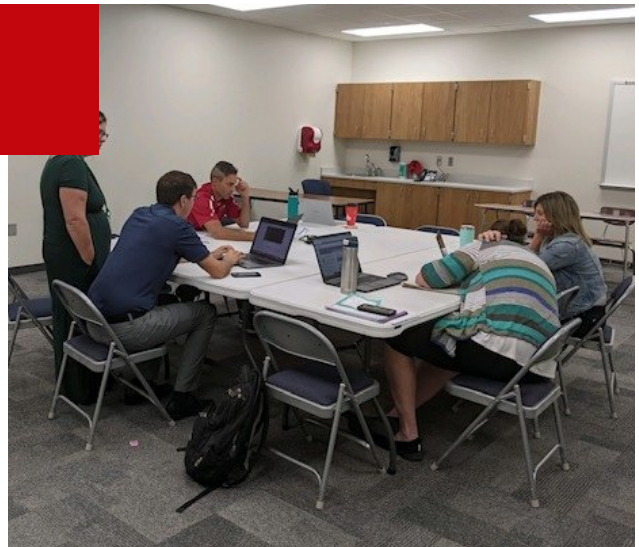

Music is good for the soul!

First-grade students are having fun practicing tuneful singing using the song "Doggy". In this game, students identify changes in pitch and intervals between the two pitches. They are practicing so--mi pattern and will later focus on the rhythm.

PROFESSIONAL LEARNING

6th - 12th-grade math teachers are working with our AEA Math Representative on the continued learning and implementation of the Illustrative Mathematics curriculum adopted this fall.

It takes big hearts to shape little minds.

Kindergarteners in Mrs. Magill's room are so excited to use their phonological awareness, phonemic awareness, and phonics skills to guess what is in the bag.
